

## Medidata Rave Clinical Views Overview

### Instructor Led Training Course Outline

**Course Description:** The purpose of the Clinical Views feature in Rave is to provide users with a method to browse up-to-date subject data entered into Rave through a simple, tabular format. During the Clinical Views Overview training, attendees will learn what clinical views are and how they are built and impacted by project changes. Additionally, attendees will learn how to configure clinical view projects, schedules, and settings.
