Rave™ Amendment Manager
Training Agenda[1]

Course Description: Amendment Manager is a tool within the Rave Architect module that helps you manage protocol amendments that occur during the lifecycle of a study.

This web-based training course teaches study builders how to roll out mid-study changes to existing subjects in the Rave system. The training includes demonstrations on planning for and executing eCRF migrations and reviews system configurations, migration-related best practices and commonly asked questions.

Attendees will learn to:

- Configure Amendment Manager settings
- Create a migration plan
- Conduct a dry run migration
- Perform a live migration

Estimated Duration: ~4 hours

Time	Topic
Amendment Manager 4 hours	Introduction
	Amendment Manager Overview
	Planning a Migration
	Executing a Migration
	Migration Job Scheduler
	Locked Subjects and Datapoints
