

Medidata Fundamentals Overview¹

Instructor Led Training Agenda (Remote Sessions)

Course Description: The Medidata Fundamentals Overview (MFO) course is an instructor-led course that demonstrates to users the basics of Medidata’s “Concept to Conclusion”. This high-level overview familiarizes new attendees with the products, modules, add-ons and integrations available from Medidata’s. This course will enable clients to efficiently and effectively map processes and user responsibilities within a clinical trial and is taught on the latest released versions of the Medidata products.

Medidata Fundamentals Overview is an introductory-level course - comprehensive training for each of the products is available through additional Medidata Academy training courses.
