

RaveEDC Fundamentals Overview

Instructor Led Course Outline

Course Description: The RaveEDC Fundamentals Overview (RFO) course is an instructor-led course that demonstrates to users the basics of the Medidata RaveEDC system and associated modules. This high-level overview familiarizes new clients with the modules and add-ons available in Medidata Rave, enabling them to efficiently and effectively map Rave-related processes and user responsibilities within their Clinical Trials.

RaveEDC Fundamentals Overview is an introductory-level course - comprehensive training for each of the products is available through additional Medidata training courses.
