Rave RTSM Pooling Supplies at Depots and Sites
eLearning Course Outline

Course Description:

This course teaches users how to create pooling groups to share inventory between studies with common article types and matching depots/sites. This training is intended for unblinded supply managers and system administrators who have permission to manage pooling groups. Attendees will learn to:

- Create pooling groups at Depot or at Site

- Assign and manage studies associated to pooling group

- Defining sharable inventory

- Managing sharable inventory within pooling group studies

Approximate Duration: 10 minutes

Module	Topic
