

Medidata Rave RTSM : Supply Accountability Overview eLearning Course Outline

Course Description:

Medidata's Supply Accountability is a unified system spanning both Rave and Rave RTSM that provides a full account of all investigational products from depot to destruction. Supply Accountability lets sponsors and investigators monitor study supply storage, supply dispensation, supply return and/or destruction.

In this course, we will demonstrate how Supply Accountability is defined at the article type level, how it is monitored through Dispensation in Rave EDC, and how supply accountability is reconciled at the site. This course will also go over the related Supply Accountability reports.

Approximate Duration: 17 minutes

Module	Topic
Welcome (1 min)	Objectives
Rave RTSM 2018.4.0 Release Training (15 min)	Defining the Supply Accountability Parameters for Article Types
	Dispensing Supply Accountability Article Types in Rave EDC
	Reconciling Supply Accountability articles at site
