Rave Configuration
eLearning Course Outline

Course Description: This course provides an overview of the Rave Configuration Module. The Rave Configuration Module allows you to specify settings that can be applied across the entire Rave application. After completing this course, you will know how to define EDC workflows, specify styles and colors within the Rave user interface and configure role-specific settings, missing codes, actions and permissions.

Approximate Duration[1]: 25 min

Module	Topic
Welcome (1 min)	Rave Configuration Training
Introduction to Rave Configuration (3 mins)	Objectives
	Accessing Configuration
	Overview of the Configuration Module
	Summary
Rave Configuration Workflow (8 mins)	Objectives
	Review Groups
	Marking Groups
	Roles and Permissions
	Missing Codes
	Reason Codes
	Role Actions and Preconditions
	Summary

---
