

Medidata Rapid Study Builder

eLearning Course Outline

Course Description: Rapid Study Builder is an efficiency-building tool, which helps to improve the specification design, implementation and UAT process by allowing collaboration between Medidata, the Sponsor, and third party vendors such as CRO's. This course will show you in detail how to use Rapid Study Builder to perform your specific responsibilities during the specification collection and logic building process.

Approximate Duration¹: ~20 min

Module	Topic
Welcome (1 min)	
Introduction to Rapid Study Builder (5 min)	Objectives
	Rapid Study Builder Overview
	Rapid Study Builder Workflow Overview
	Accessing Rapid Study Builder
	Check Your Understanding
	Summary
Rapid Study Builder Workflow (12 min)	Objectives
	Building Logic
	Queries
	Study Build Workflow
	User Acceptance Testing
	Reports
	Exercise: Sign off Requirements
	Summary

Module	Topic
Post Assessment
