

Rave Configuration Loader eLearning Course Outline

Course Description: The Configuration Loader tool in Medidata Rave allows you to efficiently create and maintain consistent Configuration settings across multiple Rave installations. Using Configuration Loader you can download all of the settings from the Rave Configuration module for offline editing and maintenance. By uploading the modified Configuration settings back into any Rave database, you can migrate Configuration settings between multiple Rave databases.

This course will provide you with a thorough understanding of how to work with Configuration settings in Configuration Loader.

Approximate Duration: 12 min

Module	Topic
Welcome (1 mins)	Rave Configuration Loader Training
Introduction to Configuration Loader (3 mins)	Objectives
	Overview of Configuration Loader
	Downloading Configuration Settings
	Exercise: Downloading the Configuration Settings Template
	Summary
Working with Configuration Settings (8 mins)	Objectives
	Configuration Settings Spreadsheet
	Assessment-Configuration Settings Spreadsheet
	Upload Process
	Upload Process Page
	Errors in the Upload Process
	Assessment-Errors in the Upload Process
	Partial Uploads
