

A Single Source for All Your Clinical Trial Data with Medidata Reporter

**Cross-System
Data Aggregation
and Reconciliation**

**Timely Insights
and Analytics**

**Enablement
of Global
Execution**

As the complexity of clinical research continues to increase, so does the pain of reporting challenges like inefficient data aggregation processes and a lack of fast and accurate reporting. Addressing these challenges today can result in a substantial drain on productivity and a significant increase in the time and cost required to conduct clinical reporting.

Fortunately, Medidata Reporter provides a single source to monitor your clinical trial research and ultimately reduce the burden imposed by reporting challenges. With Reporter, you can now have a consolidated view to unlock insights and analyze reports across multiple products. Reporter enables a greater level of control and empowerment resulting in reduced risk and expedited execution of clinical trials.

Unified Cross-Platform Reporting

Reporter provides centralized data management that links studies and sites together. With Reporter, there is one place for clinical trial data across Medidata products. Cross-platform reporting makes it easier than ever to oversee clinical trial progress and to scale best practices across all studies and functional areas. Now, through one single source, you can make decisions across the globe with greater certainty.

OBTAIN A 'REPORTER' OF YOUR DATA

Cross-System Data Aggregation and Reconciliation

View information from across products, URLs, and studies in a single report

Timely Insights and Analytics

Faster report generation with fewer timeouts and more data visualization tools

Enablement of Global Execution

Easier to monitor progress and make business decisions across all global members

THE PLATFORM OF CHOICE FOR CLINICAL RESEARCH

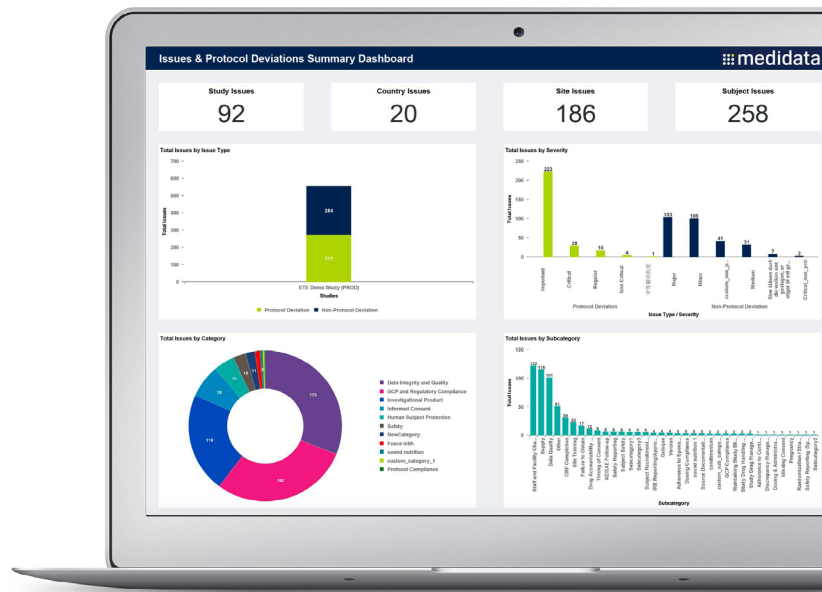

The Medidata Rave Clinical Cloud is the cutting-edge platform that transforms the clinical trial experience for patients, sponsors, CROs, and research sites. Designed with a unified data platform, the Rave Clinical Cloud creates a single source of truth for all study-related data. Simply put, enter data once and let the platform master and populate it throughout the end-to-end suite of Rave applications. Optimize operational execution, decrease the data entry and maintenance burden, and reduce the number of clinical systems across your study teams. Throw away your list of passwords, you are now on a truly unified platform.

Powerful Performance

Medidata understands how important it is to have real-time data. That's why Reporter refreshes data every 6 hours ensuring that you always have access to the most up-to-date information. Reporter provides an intuitive user interface for easy navigation, increased flexibility, and faster report generation. Reporter also offers several different out-of-the-box reports as well as a multitude of data visualizations and export options.

Reveal relationships between
disparate data

Reporter's cross-platform provides enhanced data exploration allowing users to unlock deeper insights. With Reporter previous adverse events and coding terms can be related and analyzed. By presenting standardized metadata with common standards, Reporter helps you identify issues before they are highlighted by individual study teams.

About Medidata

Medidata is leading the digital transformation of life sciences, creating hope for millions of patients. Medidata helps generate the evidence and insights to help pharmaceutical, biotech, medical device and diagnostics companies, and academic researchers accelerate value, minimize risk, and optimize outcomes. More than one million registered users across 1,400 customers and partners access the world's most-used platform for clinical development, commercial, and real-world data.

Medidata, a Dassault Systèmes company (Euronext Paris: #13065, DSY.PA), is headquartered in New York City and has offices around the world to meet the needs of its customers. Discover more at www.medidata.com and follow us @medidata. The Operating System for Life Sciences™.
