

# Getting Started with Medidata Detect (formerly Medidata Detect Fundamentals, Part 1)

## eLearning Course Outline

### Course Description:

Medidata Detect provides end-to-end data and risk surveillance, providing the ability to monitor and mitigate risks to patient safety and data integrity. "Getting Started with Medidata Detect" covers the purpose and value of each of the Medidata Detect modules:

- Patient Data Surveillance (PDS)
- Key Risk Indicators (KRIs)
- Quality Tolerance Limits (QTLs)
- Centralized Statistical Monitoring (CSM)

Approximate Duration: 12:00 minutes

Module	Topic
<b>Welcome</b> (1 min)	Objectives
<b>What is Medidata Detect</b> (2 min)	Overview of the Medidata Detect modules
<b>Patient Data Surveillance (PDS) Overview</b> (2 min)	Overview of the purpose and key tasks performed in the PDS module
<b>Key Risk Indicators (KRIs) Overview</b> (2 min)	Overview of the purpose and key tasks performed in the KRI module
<b>Quality Tolerance Limits (QTLs)</b> (2 min)	Overview of the purpose and key tasks performed in the QTL module
<b>Centralized Statistical Monitoring (CSM)</b> (2 min)	Overview of the purpose and key tasks performed in the CSM module
<b>Summary</b> (1 min)	Summary
