Ageirein: Atorus' Validated Open-Source Analytics Platform Built for Clinical Clarity

Goodbye silos. Hello synergy.

Meet Ageirein, Atorus' unified analytics platform built to help data science teams manage, analyze, and visualize data with speed, confidence, and compliance. From exploratory dashboards to validated outputs, Ageirein puts the capabilities of a powerful open-source analytics platform at the center of your strategy, supporting the full clinical analysis life cycle.

ageirein

What Is Ageirein?

Ageirein is a GxP-compliant, multilingual platform that unifies clinical analytics across teams, tools, and environments. It allows you to code, validate, visualize, and deploy, all from one secure space in your preferred language:

- Open-source analytics and visualizations powered by Shiny
- Integrated SAS and Posit capabilities for seamless interoperability
- Validation-ready outputs with compliance built in, not bolted on
- Customizable package and application sets, curated for clinical analytics
- Continuous evolution based on user feedback and industry needs

Unified, validated, and accelerated data — all in one place

Who It's for (and Why)

Data Management
- Turnkey platform leveraging trusted partner technologies
- Intuitive visualization and faster insights

Statistical Programming & Statistics
- Modular multilingual SCE with centralized data access
- Operational accelerators reduce setup and compliance effort

Clinical Operations
- Unified data access for PK, Safety, RBQM, and Biomarkers teams
- Leveraging innovative tools for faster discoveries

IT / Infrastructure & Governance
- Modular platform scales seamlessly with organization
- Change-ready to adopt emerging technology & open-source innovation

More Than an SCE: A Unified Platform for Open-Source Analytics

Ageirein was built to bring your teams, tools, and data together, right out of the box. Ageirein unifies coding, validation, visualization, and deployment in a single, GxP-compliant environment, so you can move from raw data to real decisions without switching systems or duplicating work.

Capabilities at a Glance

Shiny Dashboards, R Markdown, Quarto, and More:
Deliver rich, interactive visualizations tailored for clinical teams

GxP-Compliant Validation With OpenVal®:
Support audit readiness and regulatory submission with built-in validation workflows

Custom Package Library:
Start fast with curated clinical analytics packages; evolve as your needs do

Multilingual Compatibility:
Work with diverse tools and languages, like SAS, R, and Python, in one secure space without switching tools or losing momentum

Modular Architecture:
Adapt Ageirein to your organization's size and scale

Centralized Collaboration:
Enable unified environments and faster decisions across roles and functions

Partnered Ecosystem:
Integrate with leading cloud platforms, APIs, and data storage solutions to enable secure, scalable interoperability

Ready to Streamline Your Clinical Analytics?
