

Medidata Rave RTSM: Trial Continuity eLearning Course Outline

Course Description: In this training, we will demonstrate how to utilize Rave RTSM in the event that Rave EDC is unavailable for a particular study or study group. This course will show how to create a new subject, randomize new and existing subjects, and dispense to new and existing subjects while Trial Continuity is active. This course is applicable for roles who have the “Can access trial continuity” permission.

Approximate Duration: 10 minutes

Module	Topic
