

## Scientific Data Management for Life Sciences

Improve data integrity and quality, ensure IP protection, increase efficiency and collaboration and enable faster and better decision making.

Data lakes focus on storing data and ignore how or why it is used

Less than **10%** of new data generated is ever analyzed in life sciences

**70%**

of life sciences companies are moving from individual, separate applications to comprehensive platform solutions

Up to **50%**

gains in efficiency and throughput with integrated solutions reported by life sciences organizations

### BIOVIA HELPS

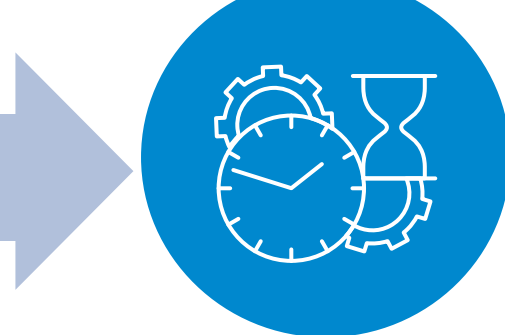

Harmonizing processes

Simplifying and standardizing IT

Accessing and leveraging data, information and knowledge

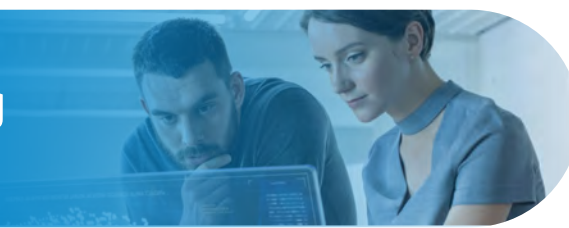

Decision making and faster time-to-market

### Reported value of Dassault Systèmes BIOVIA Solutions for Scientific Data Management

#### DATA HANDLING

Up to **95%**

reduction in time spent aggregating data from multiple sources

**85%**

reduction in time and resources needed to exchange data

Up to **60%**

reduction in time spent searching for data

#### DATA INSIGHT

**71%**

improved process understanding

**85%**

faster response to investigations

**60%**

improved visibility throughout the organization

#### DATA INSIGHT

Up to **95%**

improved quality

**22%**

reduced time-to-market

Up to **15%**

increased manufacturing productivity
