

## Challenges

**UP TO 25**  **discrete systems** used in a single trial<sup>1</sup>

**75%**  studies have **no integrated tools**.<sup>2</sup> Require manual, disjointed workflows, prone to mistakes.

 **50+ BUSINESS DAYS** **average time** to complete study setup

## Solutions

### Unify

Reduce complexity and risk with a single, unified platform for all your study data and processes

### Orchestrate

Streamline your study workflow and improve productivity with adaptable capabilities that address your unique study needs

### Accelerate

Streamline operations with an end-to-end seamless clinical process

## Results

**≤2 WEEKS**  or less to build studies with **unified EDC platform and RTSM and ePRO<sup>3</sup>**

**≤10 DAYS**  or less to **achieve database lock** after last patient visit<sup>3</sup>  
**-40%**  **reduction in data correction rates<sup>3</sup>**

**26%**  **faster enrollment** with centralized data capture<sup>3</sup>  
**64%**  **faster data capture** with unified RTSM and ePRO<sup>3</sup>

1. Based on customer survey results. | 2. Tufts Impact Report, February 2018. | 3. Based on customer case studies. Results may differ depending on size, complexity, and other factors.
