

Session Title:

A Perfect Harmony: Building DCTs for Patients, Powered by Data, and Delivered to Scale

Speaker(s):

Anthony Costello CEO, Patient Cloud

Lisa Moneymaker SVP, Clinical Operations Technologies

Date: May 24, 2022

11:00 AM - 11:30 AM

Abstract:

DCTs involve an ecosystem of tools, people, and processes - allowing patients, sites, and sponsors to participate, contribute, and monitor any clinical trial. Successfully executing DCTs often requires multiple disparate solutions integrated across the clinical continuum in order to properly communicate. But what if patients, sites, and sponsors could participate and monitor clinical trials without the integration hassles? Join to hear our experts discuss how to deliver DCTs so everyone wins.
