

Session Title:

Understanding the Lifecycle of Decentralized Clinical Trials

Speaker(s):

Michael Tucker Managing Partner

Brian Barnes Senior Director, Product Development – Clinical Operations Technology

Date: June 9, 2022

11:00 AM - 11:30 AM

Abstract:

With a growing industry trend to incorporate decentralizing solutions in trial design, what does it really mean to run a Decentralized Clinical Trial and how is it any different than running traditional clinical trials? What new technologies are needed, and do these technological advancements require new processes and organizational structure changes? Join this session to learn some of the foundational elements of designing decentralized clinical trials / hybrid trials, and how these advancements in trial design impact all of the stakeholders involved including the patient, sponsor, and site.
