Session Title:

Slow Down to Speed Up - Standardizing your Way to Quality with eCOA

Speaker(s):

Paul Taylor VP, Patient Cloud Services Medidata

Benjamin Falk Director, Procurement Services Clinipace

Date: May 24, 2022
2:40 PM - 3:10 PM

Abstract:

It may seem counterintuitive, but to reduce eCOA implementation complexity, it is becoming increasingly critical to slow down to speed up. Why? Commercial pressures to meet and beat FPI and submission goals have never been greater, yet more difficult to achieve. In this session, you will learn how to define, measure, analyze, design and verify an approach to create the standardization you need to streamline processes and deliver reliable treatments to patients faster.

You will learn how to:
- Onboard new teams effectively and think beyond the Study Operating Model to build teams by TA, centralize budgets, and drive governance
- Drive a single design experience to include customer requirements and think in objects - Visit Structures, Assessments, Validated Instruments, Scoring Functions, Reports, Extracts, Access Controls -to enhance standardization
- Measure what you manage so you can improve your KPIs as one team (CRO-Sponsor-Vendor)
