Rave EDC is the Gold Standard for Clinical Data Capture and Management

Medidata is the World’s Leading Innovator in EDC

Rave EDC - Unified on the Medidata Clinical Cloud™

Rave EDC is built on the powerful Medidata Clinical Cloud, the industry’s only unified platform dedicated to clinical research. With Rave EDC, all study data is centralized in a single location, creating a single source of truth across your entire portfolio. Selecting additional Medidata Clinical Cloud products - such as RTSM, eCOA, eConsent, and Imaging - increases the power of Rave EDC by connecting your critical applications, together, in the same data environment. At the same time, the Medidata Clinical Cloud gives you the flexibility to connect with non-Medidata applications.

What Makes Rave EDC the Most Preferred Application?

- Medidata's unparalled experience and expertise in implementing and supporting EDC
- More sites and study teams have experience with Rave EDC than any other EDC solution
- Flexibility for mid-study amendments
- Best in class data security

"Having a Partnership with a technology company whose foundation is EDC was a critical factor. Medidata has systematically grown clinical software solutions around this great technology with proven processes for implementation."

— Faye Woolf, CEO, Aperio
