Site Cloud: End of Study (EOS)

The only platform for digitizing and sharing all end of study data

HOW ARE YOU OVERSEEING YOUR EOS DATA MANAGEMENT?

Current industry practices managing EOS data face numerous issues concerning future proofing and maintaining visibility of records.

RISK OF

File loss

Technology obsolecsense

Non-compliance

Audit failure

Gain visibility with the only solution that simplifies and de-risks end of study data exchange

Site Cloud: End of Study (EOS) is the first end-to-end solution that seamlessly generates, distributes, and manages files at the end of a study.

With EOS, sites' study files are accessible and downloadable by a secure and trusted unified platform, eliminating the need to create and distribute physical media with manual acknowledgment forms.

ON-DEMAND VISIBILITY ACROSS STUDY, COUNTRY, AND SITES

Dashboard views provide near-real time metrics and status of EOS workflows including download and acknowledgement tasks for Sponsors and CROs and streamlined access for sites to manage all files.

EOS media generated

Site Cloud: End of Study
ONE REPOSITORY

and automatically distributed

SITES

Auto-notifications of EOS media availability

eSignature acknowledgement (21 CFR Part 11 compliant)

Access to 100% of data

SPONSORS / CROs

Transparency via actionable dashboards

Single UX and sign-on

Access to full audit trail and permission settings

Data available longterm, supporting site audits and ensuring compliance

Transform how study files are collected and stored

Improve operational efficiencies

Reduce manual efforts through cloud-based file distribution

Eliminate paper acknowledgement forms

Ensure compliance

Achieve compliance with controlled access and full audit trail

Sites always have access to data

Highest level of information security, data privacy, and quality management

Maintain site sustainability

Reduce site burden with a central location for receiving critical study assets

Timely and on-demand delivery of data
