

Medidata Decentralized Clinical Trials (DCT) Program

The [Medidata DCT Program](#) is a scalable, flexible, and comprehensive technology solution to virtualize as much or as little of a clinical trial as needed, including patient participation, data capture and management, monitoring and analysis, and supply dispensation. Using Medidata's Trial Dial™, you can develop your protocol to support 100% site-based studies, 100% virtual studies, and everywhere in between.

Built directly within Medidata's unified platform, Medidata's DCT capabilities combine the leading digital health technologies with unmatched patient-centricity by design and implementation expertise, creating the industry's only end-to-end, integrated, and global DCT offering. Our problem-solving methodology and patient-centric focus can help you develop a strategy specific to each protocol and patient population.

Program Benefits

Enables Complete Decentralized Trials

Medidata is the only technology solution provider that can decentralize all the key aspects of your clinical study, delivering the industry's most comprehensive patient-and-site-facing solutions, along with tools to strengthen your DCT offerings.

Solutions for Every Stakeholder on One Platform

Inspired by patients, powered by data, and securely delivered to scale - Medidata DCT solutions make up an ecosystem that connects trial experiences for patients, sites, and sponsors on one platform, bridging the gap between data and workflows.

Build Your Path to Decentralization, Together

With the tailored guidance of Medidata's professional services experts, you can virtualize your clinical trial as much or as little as you need, resulting in a truly customizable solution.

Clinical Analytics Power Smarter, Safer Trials

Medidata's risk-based monitoring solutions powered by advanced analytics improve clinical decision-making and protect patient safety, from anywhere.

Program Features

Suite of Patient-Centric Solutions

The myMedidata patient portal equips patients with tools that enable them to virtually enroll and participate in pre-, during, and post-trial activities.

Digital Oversight

Medidata's innovative digital solutions enable continuous clinical data monitoring from anywhere, allowing sponsors and CROs to innovate and optimize their approach to trial design, physical and virtual interactions with sites, and holistic risk-based oversight.

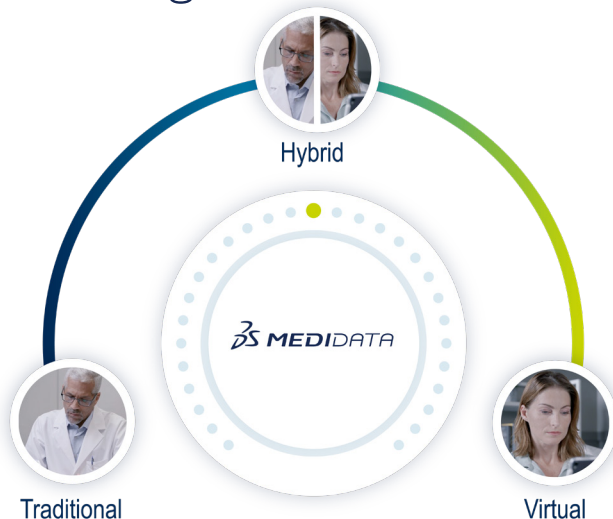

Direct-to-Patient (DtP)

Rave RTSM has the unsurpassed capabilities to deliver investigational product (IP) directly to a patient's home while efficiently managing and tracking the life-cycle of IP or item shipments from dispensation, accountability, to reconciliation.

Circuit Clinical Partnership

Medidata and Circuit Clinical provide the industry's only turnkey DCT solution that enhances patient access and inclusion through MD Prescreen recruitment concierge support, TrialJourney™ ratings and reviews system, and a comprehensive DCT investigator network with sites - all trained and certified on Medidata technology.

The Medidata Advantage

Medidata is the longtime leader in the DCT space - having run the industry's first decentralized trial in addition to the industry's largest decentralized trial. Medidata's 20+ years of continuous innovation has resulted in the industry's most comprehensive patient-and-site-facing solutions. We deliver the full range of tools to build scalable, flexible, and secure solutions to fit any level of onsite, hybrid, and fully decentralized clinical trials.

Inspired by patients, powered by data, and securely delivered to scale - our unified solutions make up an ecosystem of tools, people, and processes that let patients, sites, and sponsors participate, contribute to, and monitor any clinical trials outside of the traditional investigative settings. As your trusted DCT solution providers, Medidata is here to help you design and implement the right DCT solution for your trial.

Medidata, a Dassault Systèmes company, is leading the digital transformation of life sciences.
