

Medidata Adjudicate

Optimize Your Endpoint Adjudication on a Single Platform

Having an efficient and effective Clinical Event Committee (CEC) can reduce variability in adjudication outcomes and to ensure the best outcomes are collected for your trial. Having the right endpoint adjudication technology allows you to trace every aspect of the event, from collection, de-identification and dossier aggregation to committee review and management, giving you control and visibility of all your adjudication events.

[Medidata Adjudicate](#) is part of the Medidata Platform, and offers a cloud-based, end-to-end solution, with easily configurable modules enabling quick setup to manage endpoint adjudication in clinical trials. Medidata Adjudicate supports investigator sites, sponsors, CROs, data managers, and the CEC in collecting, managing, organizing, adjudicating and submitting clinical endpoint data.

Medidata Adjudicate Benefits

Medidata Adjudicate puts the control of your trial endpoint adjudication in your hands and allows you seamless unification with the Medidata platform.

Control

- Quick, easy study implementation with self-service configuration
- Efficient management of your complex adjudication needs
- Built in web-based pdf editor to create dossiers, including easy PHI masking, labeling, bookmark creation and organization of dossier elements

Unified Platform

- Part of the proven, scalable Medidata Platform
- One technology for all your trial needs
- Real-time visibility into all events and status
- Reduction in duplicate data entry

Flexibility

- Intelligent, flexible workflows that optimize tasks while ensuring data quality and timely review
- Multi-faceted communication tools for additional data requests and queries
- Acceptance of all data types to support any endpoint design
- Supports any type of adjudication committee design (e.g., double review with adjudication, triple review, consensus, etc.)

Ease of Use

- Simple, intuitive navigation of dossier review and task lists for efficient CEC review
- Reduction of site burden with single sign-on and cloud-based technology

Features of Medidata Adjudicate

Supports Your Endpoint Adjudication Trials:

- Customized workflows per event type
- Event status visibility and reporting
- Self-service configuration
- Flexible communication options such as additional data requests and queries with configurable query templates

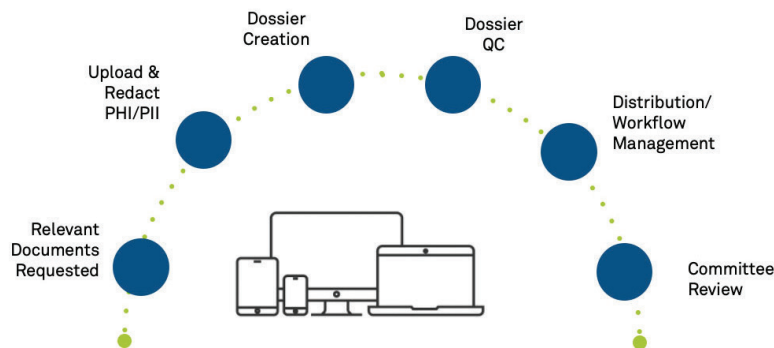

Supports Your Clinical Event Committees:

- Easy navigation of dossier to efficiently complete tasks
- Optimized workflow and assignments to ensure that work is delivered on time
- Automated triggers for committee member discordance
- Side-by-side form comparison for easy consensus review
- Autosave to ensure no work is lost

Supports Your Sites:

- Easy upload of any data type including documents and medical images
- Automatic subject creation with EDC unification
- Built-in PHI redaction with search and redact feature
- Cloud-based-No software to install
- Automated query reminders with ability to view and respond

Medidata Adjudicate offers an end-to-end adjudication solution:

Connecting your Trial, Sites and CEC

The Medidata Advantage

Medidata Adjudicate brings flexibility and efficiency to your endpoint adjudication trials - all on a single platform. Control your implementation for quicker set up and ensure you can trace, manage and automate almost every aspect of the event, including collection, de-identification, dossier aggregation and adjudicator voting.

- One technology for all your trial needs
- Do-it-yourself faster study implementation
- Optimized workflows for all adjudication trials
- Simple cloud-based tools to reduce site burden and increase CEC efficiency
