

**Effective Data
Management and Efficient
Operations in Clinical R&D**

indegene[®]

We help you expedite completion of clinical trials with efficient data management

With our technology-led innovation and domain expertise we manage diverse clinical data to optimize trial experiences, and expedite study start-up and completion,. Our comprehensive clinical data management offering encompasses refining data requirements, eCRF design, process building, integration, and amendments to study build that are essential to accelerate study execution and improve the quality of study results.

Clinical operations organizations face unique challenges

- ~16 weeks required to create the database from the past clinical trials data
- Inability to reuse and repurpose the database
- Inefficient and expensive manual processes taking 1,000+ hours for data transfer, review and standardization

Here's why Indegene Clinical Data Management

- Faster database build with integration of advanced technologies
- Expertise in building Global Library for large and emerging pharmaceutical companies across Therapeutic Areas
- Transformation of clinical trials data to meet the CDISC SDTM standards

Here's how we can help you

Here's what Indegene Clinical Data Management includes

End-to-End Clinical Data Management Support

Study Set-Up

- CRF Design and Development
- EDC Configuration
- Data Management Plan
- Data Validation Specification
- Database Build & UAT
- Data integration Set-Up

Study Conduct

- Data Management and Validation
- Clinical Data Review and Query Management
- Manual Listings Specification and Programming
- Clinical Data Coding
- SAE Reconciliation
- Vendor Data Handling & Reconciliation
- Site and User Management

Study Closeout

- Interim and Final Database Lock
- CRF PDF Generation
- Blind Data Review Meeting
- Data Archival & Documentation

We extend services across therapeutic areas, ensuring foolproof data collection. We do this:

- With our global experienced team who use multiple technologies and comprehensive data sources that offer near real time visibility
- By collaborating through digital platforms, our network of partners, overseen by clinical and medical advisors, leading to successful study outcomes
