

Data Analytics & Visualization

Clinical trials generate vast amounts of data such as patient enrollment, adverse event tracking, and protocol deviation monitoring. As the data are collected, fast and effective decisions are needed – whether to redefine your budget, mobilize on-site monitors, or adjust protocols. Well-informed decisions require filtering through complex reports and spreadsheets. Such a daunting task can be replaced by a visual story: an intuitive way to instantaneously showcase your data.

Our Platform:

All Data, One Place

- Custom Dashboards
- Graphical Representation
- Intuitive User Interface
- Interactive Tools
- Real-Time Data Updates
- Instantaneous Refresh Of Visualizations
- Web And Mobile Compatibility
- Collaboration Between Multiple Users

Our Service:

Supporting Clinical Activity In Your Organization

- **Site Monitoring:** Our tools make it straightforward to identify participant demographics and pinpoint protocol deviations, violations, and risk indicators.
- **Drug Safety:** We offer solutions to filter through adverse events and drill-down to attribution, seriousness, and grade.
- **Participant Recruitment:** Our platform provides graphical views of key accrual metrics to support meeting recruitment targets.
- **Data Wrangling:** Our service includes data clean-up and integration with multiple systems.

Your Benefits:

Tell Your Story With Data

- Discover Trends As They Unfold
- Visualize Patterns That Emerge
- Easily Identify Anomalies
- Monitor Issues As They Happen
- Take Corrective Action In Real-Time
- Drill-Down To Detail View
- Export Visualizations To PDFs Or PPT
- Share With Stakeholders Via Web

Challenge Convention.
Exceed Expectations.
