

# Data Surveillance: Create Ad-Hoc Visuals Using Data Visualizations

## eLearning Course Outline

**Course Description:** In this course, you will learn about:

- Data Visualizations and their Purpose
- How to View and Manage Various Data Visualizations, and
- How to Create Graphs such as a Bar chart, Line chart, Donut chart, and Tabular Visualization

Approximate Duration: 20 minutes

Module	Topic
<b>Welcome</b> (1 min)	Objectives
<b>Introduction</b> (1 min)	Introduction to Data Visualizations
<b>View and Manage Data Visualizations</b> (2 min)	How to Review and Manage Sata Visualizations
<b>Create a New Visualization</b> (16 min)	<ul style="list-style-type: none"><li>• How to create a Bar/Stacked Bar Chart</li><li>• How to create a Line/Multiline Chart</li><li>• How to create a Donut/Segmented Donut Chart</li><li>• Tabular Visualization</li></ul>
<b>Summary</b> (1 min)	Summary
