Medidata Rave EDC PDF Generator:
Generating PDFs
eLearning Course Outline

Course Description: This course provides the end to end process for creating submission-ready PDF files using the EDC PDF Generator. You will learn to generate PDF jobs for study case report forms, ensuring data is accurately represented and formatted to regulatory standards. Additionally, you will explore PDF results in the EDC PDF Generator and Site Cloud, gaining insights into these platforms. By the end of the course, you will understand PDF generation and its importance in clinical research and data submission, enhancing your skills in managing electronic data capture.

Approximate Duration: 22 minutes[1]

Module	Topic
