

Data Connect: Create Derived Dataset Using Transformations

eLearning Course Outline

Course Description: In this course, you will learn about:

- Derived Dataset Overview
- Roles
- How to Create a Derived Dataset Project and add a Dataset
- How to standardize data using Unit Conversion
- How to Upgrade a Transformation Project with a New Dataset Version
- How to Activate the Dataset
- How to use the Derived Dataset as a Template, and
- How to Manage a Transformation Project

Approximate Duration: 44 minutes

Module	Topic
Welcome (1 min)	• Objectives
Derived Dataset Overview (1 min)	• Derived Dataset Overview • Roles
Transform Data (25 min)	• Create a Derived Dataset Project • Add Datasets • Add Derived Variables • Create Unit Conversions • How to Publish a Project • Compare the Data Profiles
Upgrade a Transformation Project with a New Dataset Version (3 min)	• Upgrade a Transformations Project with a New Dataset Version
Activate the Dataset (4 min)	• How to Activate a Dataset • How to Activate a New Dataset Version
Manage Transformation Project (5 min)	• Use the Transformation Project as a Template • Field Transformation for Template Mapping • Export a Transformation Project

	• Deactivate a Transformation Project • Modify a Transformation Project • Archive a Transformation Project
Knowledge Check (4 min)	• 5 Questions
Summary (1 min)	• Summary
