

# Data Connect: Create Unit Conversions Using Transformations

## eLearning Course Outline

**Course Description:** In this course, you will learn about:

- Unit Conversion Overview
- Roles
- How to Create a Unit Conversion Project
- How to Add Datasets
- How to Publish a Dataset
- How to Activate the Dataset, and
- How to Manage a Transformation Project

Approximate Duration: 16 minutes

| Module                                            | Topic                                                                                                                                         |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Welcome</b><br>(1 min)                         | Objectives                                                                                                                                    |
| <b>Create Unit Conversion</b><br>(5 min)          | <ul style="list-style-type: none"><li>• How to Create a Unit conversion project and add datasets</li></ul>                                    |
| <b>Publish a Dataset</b><br>(1 min)               | <ul style="list-style-type: none"><li>• How to Publish a Dataset</li></ul>                                                                    |
| <b>Activate the Dataset</b><br>(3 min)            | <ul style="list-style-type: none"><li>• How to Activate the Dataset</li><li>• How to activate a new dataset version</li></ul>                 |
| <b>Manage a Transformation Project</b><br>(1 min) | <ul style="list-style-type: none"><li>• Export Transformation Project</li><li>• Deactivate the project</li><li>• Modify the project</li></ul> |
| <b>Knowledge Check</b><br>(4 min)                 | <ul style="list-style-type: none"><li>• Knowledge Check</li></ul>                                                                             |
| <b>Summary</b><br>(1 min)                         | Summary                                                                                                                                       |
