

Coder+ 2025.3.0 Release Training

eLearning Outline

Course Description: This training covers a few features and enhancements that are necessary to implement and support Rave Coder+ users successfully. The course is beneficial to Medidata Rave RTSM configuration and management teams.

Approximate Duration: 15 min¹

Module	Topic
Introduction (0.5 min)	Introduction & Objectives
All Tasks Report for Specific Domains (3 min)	<ul style="list-style-type: none">Generating a report for each study domain. The report provides details around all verbatims/tasks under that study domain.
ATC Prediction (4 min)	<ul style="list-style-type: none">Predicting the best ATC option when either route or indication, or both, are provided as part of the verbatim.
Creation Date Added to Upversioning Impact Report (3 min)	<ul style="list-style-type: none">Viewing the creation date of the most recent upversioning impact report in the message that appears when the user creates an upversioning impact report.
Open Queries for Pending Coding Decisions (3 min)	<ul style="list-style-type: none">Users with the Manage Coding Approvals permission, who review pending coding decisions, may put in a query immediately, instead of waiting for a coding specialist to do so after the decision has been rejected.
View Query Details in Browse and Code and Browse and Recode Workflows (1 min)	<ul style="list-style-type: none">Viewing query details associated with a coded task on the Browse and Code and Browse and Recode pages.
Summary (0.5 min)	Summary

¹ Duration listed is approximated, and does not reflect activities, simulations or assessments.
