CRO Support Services

Phase I-II Multi-Site Trials

We maintain a strategic network of investigator sites across a diverse range of therapeutic areas.

Project Management

Our Senior Project Managers ensure key project milestones are delivered on time and as promised.

Data Management

Efficient eSource/EDC design and maintenance according to CDISC standards and SDTM terminology.

Biostatistics

Comprehensive biostatistics and programming services to ensure peer-reviewed, validated datasets and outputs.

PK/PD Analysis & Modeling

Expert pharmacokinetics to provide study design consultation and PK/PD analyses and modeling.

Clinical Monitoring

CRAs qualified by training and experience to perform blinded and unblinded monitoring activities.

Medical Monitoring

Our Medical Monitor (MM) provides medical management throughout your study.

Medical Writing

Highly experienced team to prepare essential study documents such as protocols, ICFs and CSRs.

Central Laboratory Services

Our Central Laboratory streamlines multi-site trials through standardized processes, centralized testing and real-time data integration.
