

Coder+ 2026.2.0 Release Training

eLearning Outline

Course Description: This training covers a few features and enhancements that are necessary to implement and support Rave Coder+ users successfully.

Approximate Duration: 47 min¹

Module	Topic
Introduction (0.5 min)	Introduction & Objectives
Site Search Functionality (2 min)	Finding coding decisions related to a specific site by selecting Site from the Search box options and searching for coding decisions related to specific sites in the Coding Decisions grid.
Configuring Autoquery Lists (15 min)	Configuring Autoquery lists to automatically generate selected verbatim, directly to Rave EDC.
Configuring Restrict Autocode Lists (17 min)	How restrict autocode lists link specific verbatims to a study domain to prevent autocoding from being automatically processed.
Synonym Group Approval (2 min)	Users can apply a coding decision to other similar verbatims at the same time of the synonym approval and across the study group where the synonym is getting approved.
Grouped Tasks (4 min)	Users can group the same verbatim tasks with the same supplemental values together in a study environment.
Events Tasks' Domain Filtering (2 min)	How new filters in the Code to Task and Coded Decisions Events pages enable users to find events tasks more quickly.

¹ Duration listed is approximated, and does not reflect activities, simulations or assessments.

Upversion Retry (2 min)	This enhancement provides an easier way to retry upversioning.
Synonym List Assignment (2 min)	Users can change the assigned synonym list associated with a domain.
Summary (0.5 min)	Summary
