

Data Surveillance: Configure Data for Data Surveillance

eLearning Course Outline

Course Description:

In this course, you will learn about:

- What is Data Surveillance and its Purpose and
- How to Configure Data for various capabilities within Data Surveillance
 - Listings
 - AI Reconciliation
 - Clean Patient Tracker
 - Custom Graphs
 - Oncology

Approximate Duration: 67 minutes

Module	Topic
Welcome (1 min)	Objectives
Introduction (2 min)	• Data Surveillance Overview • Applications in Data Surveillance • Roles
Data Surveillance Capabilities (60 min)	Listings • Introduction to Data Sets and Listings- 1.5 • View and Manage Data Sets3 • Create Data Listings4.5 • Create Rave Queries 2 • Manage Listings 1 • Filter/Activate/Deactivate Listings 1 • Create Listings Template 2 • Vendor Management Introduction 0.5 • Example of Vendor Communication 1 • Setting Up Vendor Access 0.5 • Configure a Vendor Group 1.5 AI Reconciliation • Introduction to AI Reconciliation 0.5

	• Configure AI Reconciliation Reports – Event Analysis 2 • Configure External Data Source for AI Reconciliation Reports – Event Analysis 1 • Configure AI Reconciliation Reports – Lab Measurements 1 • Configure AI Reconciliation Reports – Lab Measurements 0.5 Clean Patient Tracker • Introduction to AI Reconciliation 1.5 • Configure Clean Patient Tracker 1.5 Custom Graphs • Introduction 1 • Create a New Custom Graph 24 • Custom Graphs Templates 2 Oncology • Oncology Analytics 1.5 • Map Oncology Data to View in RECIST 1.1 Dashboard 6.5
Unified Scheduler (3 min)	• Listings • AI Reconciliation • Patient profiles • Custom Graphs
Summary (1 min)	Summary
